There have been a total of 290 confirmed cases of COVID-19 in Cayuga County.

Discharges- total year to date

There have been 240 individuals discharged from Mandatory Isolation.

Deaths

There have been four Cayuga County deaths related to COVID-19.

Additional Information

Along with the increase in the number of confirmed positive cases, we have seen an exponential increase in the number of contacts (the people who have been exposed to the confirmed positive cases).

It has become more evident in recent weeks that the uptick in COVID-19 cases in our county is related to more widespread community spread/transmission of the virus. As contact tracing has revealed more and more people are participating in social gatherings including parties and a baby shower. At these gatherings social distancing was not maintained, mask wearing and mass gathering rules were not being followed.

Not only are we seeing an increase in the number of contacts, but recently many of our people in quarantine are later testing positive for COVID-19 due to the exposure that placed them into quarantine. This is why when doing contact tracing, it is important that people are honest about who they have been in contact with and also why it is so very important that people in mandatory quarantine adhere to the legal order issued by our department.

As we move forward as a community, the Cayuga County Health Department is asking the public to:

- stay home when sick
- practice safe social distancing by staying six feet apart from others both indoors and outdoors
- wear a face covering both indoors and outdoors when safe social distancing (six feet apart) cannot be maintained
- limit the gatherings we attend
- keep our social circles small
