Cayuga County COVID-19 Superspreader Event #2

Over the Halloween weekend, many people gathered socially. As we are about three weeks out from Halloween the Cayuga County Health Department is still managing cases associated with those gatherings.

The attached graphic, demonstrates how quickly COVID-19 can spread and just how contagious the virus is.

This gathering resulted in five positive cases with over 100 students and staff being placed into quarantine from a local school district. This particular gathering demonstrates how one social gathering can have significant impact on our community, including our schools.
