Deaths:

There have been 150 total reported Cayuga County deaths related to COVID-19.

Additional Information:

The Centers for Disease Control and Prevention (CDC) reports that Cayuga County's COVID-19 community level is currently LOW. The CDC calculates the community level by looking at hospital beds being used, hospital admissions, and the total number of new COVID-19 cases in the county.

The CDC reports that Cayuga County's community transmission level is currently SUBSTANTIAL. The CDC calculates the community transmission level by looking at the number of new cases over the past 7 days as well as the reported percent positivity rate over the past 7 days. See the table below for more details. The community transmission level helps healthcare facilities determine visitation policies during the COVID-19 pandemic.

Determining Transmission Risk

If the two indicators suggest different transmission levels, the higher level is selected

	Low	Moderate	Substantial	High
New cases per 100,000 persons in the past 7 days*	<10	10-49.99	50-99.99	≥100
Percentage of positive NAATs tests during the past 7 days**	<5%	5-7.99%	8-9.99%	≥10.0%
