

MATCHLINE SEE SHEET L-1.6

- NOTES**
- Existing and proposed utilities are not shown on this plan. Refer to other Contract Plans and Documents for specific utilities. The Contractor is responsible for the coordination of all utilities within the contract limits.
 - New pavement and curb shall meet line and grade of existing pavements and curb, unless noted otherwise. Provide a clean, straight saw-cut edge where they meet.
 - Work within the Town of Waterford right-of-way shall be in accordance with all current Town standards. The Contractor shall be responsible for all permitting and fees required.
 - See "Erosion and Sedimentation Control Notes" on sheet C-3.0B and "Stormwater Pollution Control Notes" on sheet C-3.0B and the Specification for additional requirements. Additional sedimentation and siltation controls shall be installed as required by the Engineering Department/Inland Wetlands Enforcement Officer of the Town of Waterford or the Architect.
 - All proposed walks and pads shall be cross-pitched at 1/4" per foot (2%) minimum, unless otherwise noted.
 - All site walks (exclusive of those noted as "ramps") along designated "Accessible Routes" shall have a maximum slope of 1:20 with a maximum cross-slope of 1:50. All designated "Accessible Routes" shall meet all current applicable State and Federal A.D.A. requirements.
 - Curb ramps shall not exceed a slope of 1:12 (8.33%) or a maximum rise of 6" in 6 feet. See grading plan and detailed grading of specific areas on sheet L-1.1 & L-1.2.
 - Erosion control matting shall be required for stabilizing all disturbed slopes 4:1 or greater. Refer to the Specifications.
