1.0 INTRODUCTION

The Cayuga County Legislature (“County”) is proposing improvements to its emergency communications system (“Project”). This Final Generic Environmental Impact Statement (“FGEIS”) has been prepared on behalf of the County for the Project in accordance with the requirements of the New York State Environmental Quality Review Act (“SEQRA”) and its implementing regulations. A Final Generic Environmental Impact Statement is intended to summarize public and involved agency comments on a Draft Generic Environmental Impact Statement and provide a response to substantive comments raised. No potentially involved or interested agency comment provided comments on the Draft Generic Environmental Impact Statement prepared for the Project (“DGEIS”). Additionally, no comments were received from the public in relation to the DGEIS. This FGEIS summarizes the SEQRA process to date and satisfies the requirements of SEQRA. The FGEIS also incorporates the DGEIS by reference.

1.1 THE PROJECT

The Project was described in detail in the DGEIS. Generally speaking, the County recognized the need to upgrade the existing public safety and public service communications systems located in Cayuga County due to issues such as diverse and incompatible protocols of systems, disparate hardware, inconsistent security, lack of data transmission capability, uncoordinated development, as well as upcoming Federal Communications Commission Relocation requirements.

The County proposes to address these concerns with an upgrade to the existing systems which incorporates several radio technologies, consisting primarily of a UHF Simulcast Trunked system. The system would allow for clear communications throughout Cayuga County as well as expandability for future technology. The system would be made up of 7-15 sites located on new and existing telecommunications towers and potentially other structures, as well as one or more Network Management Centers (“NMCs”) to provide dispatch services and regional support for the system, system management and administration, and other features. *See* DGEIS Section 2.0.

1.2 STATE ENVIRONMENTAL QUALITY REVIEW ACT COMPLIANCE

SEQRA’s purpose is to ensure a careful review by all interested parties of any potentially significant adverse environmental impacts at the earliest possible time in the development of a project. By fostering public discussion of potentially significant adverse environmental impacts

prior to any Project deployment, SEQRA has and will continue to afford the County important opportunities to obtain information that will assist the agency in making siting decisions that meet Project Coverage Requirements. The County will ensure that any potential significant adverse environmental impacts of the Project are avoided or mitigated to the maximum extent practicable.

The County has acted as lead agency for the environmental review of the Project. Because the Project will involve construction of a number of new towers and refurbishing existing towers which will span the entire geographic area of the County, and, in some instances, in areas neighboring Cayuga County, the County determined to conduct a generic review of Project. The County prepared and circulated a draft scope for a generic environmental impact statement on August 9, 2010. The County gave written notice of the draft scope to potentially involved agencies and interested parties, to the extent that they could be identified, inviting them to participate in the SEQRA process.

The County invited agencies and the public to submit written comments on the draft scope and conducted a public scoping session at the Cayuga County offices on August 16, 2010. The scoping process was designed to focus the GEIS on any potentially significant adverse impacts of the action and to eliminate consideration of irrelevant or non-significant impacts. No comments were received on the draft scope. Accordingly, the County prepared a final scope, which was approved by the County on September 28, 2010, and circulated to potentially involved and interested agencies in accordance with SEQRA.

The County prepared the DGEIS on the basis of the final scope and on the criteria set forth in 6 NYCRR parts 617.9 and 617.10. On October 26, 2010, the County accepted the DGEIS as adequate with respect to its scope and content for the purpose of commencing public review and distributed it to potentially involved and interested agencies. The County also made the DGEIS available for public review at the Seymour Public Library, 176 Genesee Street, Auburn, NY 13021 and online at <http://co.cayuga.ny.us/radio-project.html>. Pursuant to 6 NYCRR section 617.12(c)(1), the County published a Notice of Acceptance of Draft GEIS and Public Hearing in the November 3, 2010 edition of the ENB. *See* Appendix 1 (A).

The County also mailed a Notice of Completion of Draft Generic Environmental Impact Statement & Notice of SEQRA Public Hearing to over 75 potentially involved and interested agencies. *See* Appendix 1 (B) for a copy of the notice. Further, notice of the hearing was published in accordance with SEQRA in the Citizen on October 31, 2010 and in the Post Herald on November 3, 2010. *See* Appendix 1 (C) and (D).

A public hearing was held on November 18, 2010 at the BOCES, 1879 West Genesee Road, Room 1, Auburn, NY. No comments were received. *See* Appendix 2 for Transcript. The Public Notices published in relation to the DGEIS for the Project stated that comments would be received through Monday, November 29, 2010. No written comments were received. Accordingly, this FGEIS serves to acknowledge that the County as lead agency has met its obligations pursuant to SEQRA and provided several opportunities for public and governmental participation throughout the process.

Upon acceptance of this FGEIS, the County will circulate the FGEIS to the over 75 potentially involved and interested agencies, as well as the public in accordance with SEQRA.

1.3 THE DGEIS

The DGEIS concluded that the construction or operation of the Project will not result in significant adverse impacts to geology, water resources, wetlands and floodplains, air quality, agricultural resources, transportation, community services and utilities, or demography, resulting from the construction or operation of the Project. To the extent that there may be any possible adverse environmental impacts to these resources, they will be minimized to the greatest extent practicable.

Potentially significant impacts to natural, human and cultural resources identified in the DGEIS include terrestrial and aquatic ecology (avian species), land use, visual resources, noise, historical and archaeological resources, and human health and safety (radiofrequency electromagnetic emissions effects). Any impacts will be limited to the maximum extent practicable by adherence to the siting guidelines (described fully in section 5.0 of the DGEIS) and analysis of individual potential sites as they are identified. As stated in the siting guidelines, collocation on existing, County or municipally-owned towers, buildings or other Project-suitable structures will be employed where feasible. The siting guidelines and other mitigation measures included in the DGEIS will minimize or avoid any potential significant adverse impact to the maximum extent practicable.

1.4 CONCLUSION

This FGEIS will be circulated to potentially interested and involved agencies and the public in accordance with SEQRA. Those parties may consider the FGEIS for a time period of not less than ten calendar days prior to the County making a decision on the Project and, as appropriate, issuing a Findings Statement in accordance with SEQRA.

ENB - Region 7 Notices 11/03/2010

Negative Declaration

Onondaga County - The Joint Schools Construction Board (JSCB), as lead agency, has determined that the proposed Phase I Modernization Plan for Fowler High School will not have a significant adverse environmental impact. The action involves interior and exterior renovations, including improvements such as:

- A 45,870 square foot addition.
- Replacement of roofs and windows.
- Renovation of educational support spaces including laboratories and offices.
- American with Disabilities Act (ADA) compliance.
- Installation of new mechanical, electrical and plumbing systems.
- Reconstruct two existing parking lots and entrance.

- Miscellaneous drainage improvements.
- Improve Falcon Stadium including new field, bleacher system, running track and lighting system.
- Upgrade surface of existing tennis courts.
- Encourage sustainable building practices by following LEED recommendations.

The project is located at the Fowler High School, 316 South Geddes Street, Syracuse, New York.

Contact: Mary Robison, JSCB, Room 401 Syracuse City Hall, Syracuse, NY 13202, Phone: (315) 448-8200.

Onondaga County - The Onondaga County Industrial Development Agency, as lead agency, has determined that the proposed Central Land LLC Medical Office/Ambulatory Surgery Center will not have a significant adverse environmental impact. The action involves the acquisition of interest in land, construction of a 93,000 square foot medical/education center building for Orthopedic, Ambulatory Surgery and related services, installation of machinery and equipment, the grant of certain financial assistance, the lease or sale of the project facility and assistance in the financing of the project. The project is located on Fly Road in East Syracuse, New York.

Notice of Acceptance of Draft GEIS and Public Hearing

Cayuga County - The Cayuga County Legislature, as lead agency, has accepted a Draft Generic Environmental Impact Statement on the proposed Cayuga County Emergency Communications Project. **A public hearing on the Draft GEIS will be held on November 18, 2010 at 7:00 p.m. at the BOCES, 1879 West Genesee Street Road, Room 1, Auburn, NY 13021.** Written comments on the Draft GEIS will be accepted until November 29, 2010. The Draft GEIS is available at the Seymour Public Library, 176 Genesee Street, Auburn, NY 13021 and on line at: <http://co.cayuga.ny.us/radio-project.html>.

The action involves a proposal by the County to implement an Emergency Communications Project for voice and data radio communications services to enable public safety and public service entities operating within Cayuga County to better respond to and protect our citizens. The Project would include development of a state-of-the-art digital trunked land mobile radio system. The proposed Project is fundamentally an

infrastructure, a collection of radio sites located throughout the County interconnected by a network, monitored and controlled by a pair of redundant operations centers. The network would consist of a number of antennas collocated on existing telecommunications towers and/or sited on new towers constructed at locations yet to be determined. Additionally, one or more operations centers will be constructed and/or sited in existing facilities. The project is located throughout Cayuga County, New York.

Contact: Fred Westphal, Cayuga County, 160 Genesee Street, Auburn, NY 13021, Phone: (315) 253-1274, E-mail: fwestphal@cayugacounty.us.

Notice of Completion of Draft Generic Environmental
Impact Statement & Notice of SEQRA Public Hearing
dated October 26, 2010

State Environmental Quality Review

Notice of Completion of Draft Generic Environmental Impact Statement & Notice of SEQRA Public Hearing

Date: October 26, 2010

This notice is issued pursuant to 6 NYCRR Part 617 of the implementing regulations pertaining to Article 8 (State Environmental Quality Review Act) of the Environmental Conservation Law.

A Draft Generic Environmental Impact Statement has been completed and accepted by the Legislature of the County of Cayuga as lead agency, for the proposed action described below.

Name of Action: Cayuga County Emergency Communications Project

Lead Agency: Cayuga County Legislature
160 Genesee Street
Auburn, NY 13021

SEQRA Status: The County has determined that the Project is a Type I Action.

Description of Action: The County proposes to implement an Emergency Communications Project for voice and data radio communications services to enable public safety and public service entities operating within Cayuga County to better respond to and protect our citizens. The Project would include development of a state-of-the-art digital trunked land mobile radio system. The proposed Project is fundamentally an infrastructure, a collection of radio sites located throughout the County interconnected by a network, monitored and controlled by a pair of redundant operations centers.

The network would consist of a number of antennas collocated on existing telecommunications towers and/or sited on new towers constructed at locations yet to be determined. Additionally, one or more operations centers will be constructed and/or sited in existing facilities.

Location: The Project will involve the establishment of Project facilities in locations across Cayuga County, and where necessary due to geographic coverage requirements, in certain areas adjacent to Cayuga County. The eventual locations for the facilities will be selected to avoid, to the extent practicable, previously undeveloped sites. The use of existing county-owned infrastructure and properties will be a priority.

Public Hearing: The County will conduct a public hearing on the DGEIS at the BOCES, 1879 West Genesee Street Road, Room 1, Auburn, NY 13021, on November 18, 2010 at 7 p.m.

Written Comments: Comments on the Draft GEIS are requested and will be accepted by the contact person identified below until the close of business on Monday November 29, 2010.

Potential Environmental Impacts: The draft generic environmental impact statement (DGEIS) identifies and examines the following potential impacts: various natural resources including geology, air quality, water resources, terrestrial and aquatic ecology and agricultural resources; human resources including transportation systems, compatibility with existing land use and zoning, community services and demography; cultural resources including visual resources, noise disturbance, historical and archaeological resources; and public health and safety associated with, among other things, radiofrequency electromagnetic emissions. The DGEIS also considers potential secondary and cumulative impacts of the Project, and alternatives to the Project (including the "No Build" alternative).

A copy of the Draft / Final EIS may be obtained from:

Contact Person: Fred Westphal, Esq.

Address: 160 Genesee Street, Auburn, NY 13021

Telephone Number: (315) 253-1274

A copy of the DGEIS is available for inspection at the Seymour Public Library, 176 Genesee Street, Auburn, NY 13021 and at <http://co.cayuga.ny.us/radio-project.html>

A copy of this notice must be sent to:

Department of Environmental Conservation, 625 Broadway, Albany, New York 12233-1750

Chief Executive Officer

State Environmental Quality Review
Notice of Completion of Draft
Generic Environmental Impact
Statement & Notice of SEQRA
Public Hearing
Date: October 26, 2010
This notice is issued pursuant to 6
NYCRR Part 617 of the implement-
ing regulations pertaining to Article
8 (State Environmental Quality Re-
view Act) of the Environmental
Conservation Law.
A Draft Generic Environmental Im-
pact Statement has been complet-
ed and accepted by the Legislature
of the County of Cayuga as lead
agency, for the proposed action
described below.
Name of Action: Cayuga County
Emergency Communications
Project
Lead Agency:
Cayuga County Legislature
160 Genesee Street
Auburn, NY 13021
SEQRA Status: The County has de-
termined that the Project is a Type
I Action.
Description of Action: The County
proposes to implement an Emer-
gency Communications Project for
voice and data radio communica-
tions services to enable public
safety and public service entities
operating within Cayuga County to
better respond to and protect our
citizens. The Project would include
development of a state-of-the-art
digital trunked land mobile radio
system. The proposed Project is
fundamentally an infrastructure, a
collection of radio sites located
throughout the County intercon-
nected by a network, monitored
and controlled by a pair of redund-
ant operations centers.
The network would consist of a num-
ber of antennas collocated on ex-
isting telecommunications towers
and/or sited on new towers con-
structed at locations yet to be
determined. Additionally, one or
more operations centers will be
constructed and/or sited in existing
facilities.

Location: The Project will involve
the establishment of Project faci-
ties in locations across Cayuga
County, and where necessary due
to geographic coverage require-
ments, in certain areas adjacent to
Cayuga County. The eventual lo-
cations for the facilities will be se-
lected to avoid, to the extent prac-
ticable, previously undeveloped
sites. The use of existing county-
owned infrastructure and proper-
ties will be a priority.
Public Hearing: The County will
conduct a public hearing on the
DGEIS at the BOCES, 1879 West
Genesee Street Road, Room 1,
Auburn, NY 13021, on November
18, 2010 at 7 p.m.
Written Comments: Comments on
the Draft GEIS are requested and
will be accepted by the contact per-
son identified below until the close
of business on Monday November
29, 2010.
Potential Environmental Impacts:
The draft generic environmental
impact statement (DGEIS) identi-
fies and examines the following
potential impacts: various natural
resources including geology, air
quality, water resources, terrestrial
and aquatic ecology and agricultur-
al resources; human resources in-
cluding transportation systems
compatibility with existing land use
and zoning, community services
and demographics; cultural resour-
ces including visual resources, noise
disturbance, historical and archa-
eological resources; and pub-
lic health and safety associated with
among other things, radiofrequ-
ency electromagnetic emissions.
DGEIS also considers poten-
tial secondary and cumulative im-
pacts of the Project, and alternative
actions for the Project (including the "No B
alternative).
A copy of the Draft / Final EIS
can be obtained from:
Contact Person: Fred West
Esq.

listen and receive public input on the draft generic Environmental Impact Statement for the Cayuga County Emergency Communications Project. All substantive comments received at this hearing will be addressed in the Final Generic Environmental Impact Statement for this project. We appreciate you taking the time to join us this evening.

The Project involves a proposal by Cayuga County to develop an Emergency Radio Communication System for voice and data radio communications services to enable public safety and public service entities operating within Cayuga County to better respond to and protect its citizens.

The Project would include development of a state-of-the-art digital trunked land mobile radio system. The proposed Project is fundamentally an infrastructure, a collection of radio sites located throughout the County and, to the extent

Hearing Officer

1 explain some of the elements of the
2 State Environmental Quality Review Act
3 also known as SEQRA. SEQRA requires
4 state and local governments to examine
5 potential significant environmental
6 impacts for projects such as this one
7 before those projects can be approved,
8 funded or actually started. Under SEQRA
9 a lead agency is established and made
10 responsible for conducting a thorough
11 review process, including gathering
12 public comment, generating an
13 environmental impact statement,
14 evaluating reasonable alternatives, and
15 examining measures that can be
16 implemented to mitigate any impact that
17 might result from the Project. The
18 overall goal of SEQRA is to be certain
19 that governmental agencies consider the
20 environmental impact of a project along
21 with the social, economic, and public
22 benefits before a decision is made to
23 proceed.
24

25 SEQRA has been used to review

hundreds of projects in the State of New York. A cornerstone of SEQRA is public participation. SEQRA is designed to provide members of the public opportunities to offer comments and seek information on a planned project. The first step is the creation of a draft scope which outlines what will be included in the environmental impact statement.

The County conducted a public scoping session and established a period of time to receive written comments. No comments were received during the scoping process. Accordingly, a draft generic Environmental Impact Statement was prepared, and on the 28th of October, 2010 the county accepted the draft generic Environmental Impact Statement as complete for the purposes of commencing the public review. The draft generic Environmental Impact Statement is made up of two volumes including 13 appendices, consisting of more than 400

Hearing Officer

1
2 Monday, November 29, 2010. All comments
3 received today and during the comment
4 period will be reviewed and considered
5 by the County in preparation of a final
6 generic Environmental Impact Statement.
7 Once prepared and accepted by the lead
8 agency, the final generic Environmental
9 Impact Statement will then be circulated
10 to citizens, local governments, involved
11 agencies and other interested parties.
12 We assure you that all comments received
13 today will be considered in the
14 development of the final generic
15 Environmental Impact Statement. And as
16 you can see we have enlisted the
17 services of a stenographer (court
18 reporter) who is making a record of
19 these comments made at this session.

20 With that said I would invite anyone
21 who wishes to provide any comments that
22 you may have regarding the draft generic
23 Environmental Impact Statement to sign
24 up on the sign up form located at the
25 door on the table to my right. Speakers

Hearing Officer

1
2 will then be called in the order that
3 their names appears on the list. For
4 record keeping purpose please provide
5 your name and if you are speaking on
6 behalf of a group, please identify the
7 group that you represent as well, prior
8 to sharing your comments. Please keep
9 in mind that the purpose of this meeting
10 is to gather comments from as many
11 interested parties as possible. The
12 County's representatives are not in a
13 position to address questions or
14 comments that you might have about the
15 Project this evening, however each of
16 your comments will be addressed in
17 writing in the final generic
18 Environmental Impact Statement that will
19 be prepared after the comment period
20 ends. Thank you.

21 I note that nobody has signed in.
22 Does anybody want to speak? It is now
23 7:08 and nobody is here prepared to
24 speak so with that I will close the
25 public hearing. Thank you.

REPORTER'S CERTIFICATE

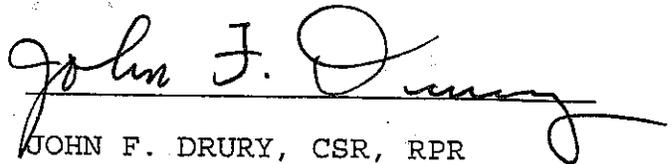

I, JOHN F. DRURY, Court Reporter and
Notary Public, certify:

That the foregoing proceedings were taken
before me at the time and place therein set forth, at
which time the witness was put under oath by me;

That the testimony of the witness and all
objections made at the time of the examination were
recorded stenographically by me and were thereafter
transcribed;

That the foregoing is a true and correct
transcript of my shorthand notes so taken;

I further certify that I am not a relative or
employee of any attorney or of any of the parties nor
financially interested in the action.

JOHN F. DRURY, CSR, RPR

Notary Public
