Additional Information

Since the beginning of July, there has been a significant delay in the laboratory analysis and reporting of COVID19 test results across New York State. In some cases, results are taking up to or more than 7 business days. The New York State Governor's office and the New York State Department of Health are aware of this issue.

We would like to remind the public and reinforce the importance of wearing a face covering when in public, safe distancing and proper hand hygiene. While non-essential gatherings of up to 50 people are allowed in Phase 4, it is important to remember the more gatherings people participate in, the greater the risk of exposure.

Below is a chart that demonstrated the daily total of active cases we have had in isolation on any given day. This chart below, does not account for the number of cases in quarantine on a daily basis.
