Additional Information

Local health departments now have the freedom and flexibility to welcome anyone who is eligible for vaccine through our clinics. We also are aware that NYS has expanded eligibility as today and will again on March 17, 2021. All of these changes are exciting and we hope that with these changes, our vaccine allotments will increase so we can more quickly vaccinate our residents. When we have more information available we will be sure to communicate that to the public.

The availability of the vaccine is not limited to just the health department. Individuals are encouraged to work with local pharmacies, federally qualified health centers and the NYS mass vaccination sites to get an appointment. To make the most efficient use of our vaccines, we do ask that if you are on a number of wait lists or if you have appointments scheduled at multiple locations, that once you receive the vaccine, you remove your name or cancel other appointments that you will not need.
