***The Cayuga County Sanitary Code requires that all contractors who install septic systems in Cayuga County obtain a permit from the Cayuga County Health Department. This is simply a list of the contractors who are presently registered with the department. It is not an endorsement of any one of them. You should take the necessary steps to check out a contractor for technical competence, integrity and level of insurance, etc. before hiring as you would before hiring any contractor. You should always ask for references and check them out.***
